PERSONAL STATEMENT

Computer Science undergraduate with a strong focus on building structured, data driven applications. I have a solid foundation in Java and Object Oriented Programming (OOP), which I apply to developing clean, maintainable logic and managing data persistence through SQL and File I/O. Currently, I am responsible for the backend development of a real-time assistive technology system, focusing on efficient data handling and core system logic. With a background in competitive hackathons and IEEE, I enjoy working in collaborative environments where I can translate complex requirements into functional software solutions.

EDUCATION

BSc (Hons) Computer Science

September, 2024 – Present

University of Westminster (UK) – IIT, Sri Lanka

- Developing strong foundations in software engineering, data structures, algorithms, and system design.
- Applied UI/UX principles in academic and project-based environments.
- Engaged in team-based software development projects focusing on real-world problem solving.
- Conducted in depth market research and competitive analysis to identify new growth opportunities and inform strategic planning for clients.

Foundation in Computing

Informatics Institute of Technology (IIT) - Colombo

September, 2023 – September, 2024

- Achievement - Completed with Merit Award
 - Focused on programming fundamentals, web development, and introduction to digital design, user interfaces, and interactive applications.
 - Built practical experience in frontend development and database integration
-

PROJECTS

Drishti Smart Glasses-AI Powered Smart Glasses & Drishti Mobile App (SDGP Group Project)

[GitHub link](#), [Ongoing](#)

Technologies- Figma, Docker, CI/CD, Cloud Deployment, Mobile Intergration

- Co-designed the complete assistive smart glasses system for real-time outdoor navigation.
- Led the design of the mobile app prototype using Figma.
- Developed a Flask backend with REST APIs to process real time SOS alerts and validate GPS data.
- Integrated Firebase Firestore to securely log emergency coordinates and user data.
- Architecting Docker-based containerization for AI model deployment and backend services.

Poacher Guard App -Wildlife Protection Mobile app (First Year Group Project)

Completed

Technologies- Figma

- Developed a smart assistive solution for visually impaired users, integrating real-time object detection, OCR text reading, gesture-based controls, and SOS emergency alerts.
- Built a connected mobile app enabling caregiver tracking, live location monitoring, and SMS-based emergency notifications.

Expense Tracker System-Personal project (Individual Project)

[GitHub link](#), Ongoing

Technologies-Java, File I/O (CSV), Object-Oriented Programming (OOP)

- Developed a Java application to manage daily spending using Object-Oriented Programming (OOP), ensuring the code is organized and easy to maintain.
- Implemented data storage using CSV file management, allowing the app to save and load expense history automatically so no data is lost between sessions.
- Created user tools to add, view, and delete records by unique IDs, with built-in features to filter spending by categories like Food or Travel.

SKILLS

- **Technical Skills** : Java (OOP), Python, SQL.
- **Web & Tools** : HTML/CSS, Git/GitHub, IntelliJ IDEA, VS Code.
- **Professional Skills** : App Design & Prototyping, Data Management (Saving/Loading), System Logic Design, Technical Writing.
- **Soft Skills** : Problem solving, Adaptability, Effective Interpersonal Communication, Time Management.

ACHIEVEMENTS & CERTIFICATIONS

- IEEE Global Hackathon -Participant
- Vertex 2025 -Participant
- Codesprint 2025- Participant

REFEREES

Mr. Salitha Perera

Lecturer-Faculty of Computing(IIT)
Informatics Institute of Technology
Email: salitha.p@iit.ac.lk
Tel: +94 743922332

Ms. Savinthe Suwandarantna

Assistant Lecturer-Faculty of Computing(IIT)
Informatics Institute of Technology
Email: savinthe.s@iit.ac.lk
